THE UPDATE

RECAP

WHERE WE LEFT OFF

SIGNALS CONCEPT

FEED CONCEPT

Signals

Data map. Each person becomes a dot.

Feed

Social layer. Photos, connection, community.

The direction: merge them.

DIRECTION

WHAT SHAPED THE DIRECTION

WHAT WE KEPT

The dot map
Validated as community protection, not fear.

The photo moment
Lowest-friction entry point at a party.

The morning text
Solves the follow-through gap.

Zip code entry
PRC needs AIDSVu-traceable data.

WHAT WE MOVED AWAY FROM

Feed as social browsing
Risked reading as a hookup app.

Signals as standalone map
Too abstract without photos to ground it.

Vibe selection
Pulled away from health education.

WHAT'S NEW

Onboarding screen before the photo.

PrEP question shapes the experience.

County data cards in the feed.

Map tab for deeper exploration.

EVOLUTION

BEFORE AND AFTER

Signals

Data map, awareness radius.

Feed

Social photos, community layer.

→

The Feed

One product. Data first, social second.

Same data, different framing. The merge keeps Signals' rigor and the Feed's warmth.

THE JOURNEY

THE USER FLOW

1	**Home screen**	Tonight's photos cycling. Tap to start.
2	**Onboarding**	What this is and what you'll be asked.
3	**Photo**	3-2-1, one shot.
4	**Zip code**	Unlocks your area's data.
5	**PrEP question**	Shapes the card, radius, and morning text.
6	**Close the gap**	National PrEP story, 2012 to today.
7	**Your community**	Your borough's numbers. Dots recalculate.
8	**Your impact**	Your photo among the dots.
9	**Card + contact**	Photo tinted, phone, name, IG.
10	**Join the feed**	Public or private. Both get morning text.
11	**Done**	QR code, back to idle.

02

THE PRODUCT

DEMO

ONBOARDING

Context first. Photo second. Data third.

Intro explains the process before any input. One photo, one question, your data.

DATA

CLOSE THE GAP

PREP SLIDER DEMO

Drag the slider. PrEP grows to 500K.

Button stays locked until 2023. PrEP is working nationally.
Next screen shows your zip.

DATA

SEE YOUR COMMUNITY

Swipe through nearby counties. Dots recalculate.

White dots: unaware. Blue: aware. The ratio is the gap.

DATA

YOUR IMPACT

IMPACT DEMO

Your photo among the dots. Tap. Awareness spreads.

Tap your photo. Dots around you turn blue. Awareness ripple, not a data claim.

PERSONALIZATION

YOUR ANSWER CHANGES THE EXPERIENCE

AFFIRMATION FLOW

"I'm on it"

Tone: Affirmation. Centered around contribution.

"Hey [name] — you're already showing up. Here's how your community is closing the gap."

NORMALIZING FLOW

"I've heard of it"

Tone: Normalizing. Proximity and access.

"Hey [name] — a lot of people are where you are. Here's what PrEP looks like near you."

WELCOMING FLOW

"What's PrEP?"

Tone: Welcoming. Discovery and community.

"Hey [name] — you just learned something new. A lot of people around you already know. Here's more."

RESPECTFUL FLOW

"Prefer not to say"

Tone: Respectful distance. Purely geographic.

"Hey [name] — thanks for showing up last night. Here's what prevention looks like in your area."

METHODOLOGY

HOW WE CALCULATED EVERYTHING

Every number traces to the AIDSVu spreadsheet.

The Slider (Close the Gap)

AIDSVu national PrEP totals by year. Real headcounts, 2012 to 2023.

The State Map (Your Community)

County-level prevalence and PrEP rates. Formula reruns on each swipe.

The Impact Screen

No AIDSVu data. Awareness metaphor only. Not a data claim.

The Gap Ratio

PrEP rate per 100K divided by diagnosis rate. Two published numbers.

What We're Working With

- AIDSVu national PrEP totals (2012–2023)
- County-level prevalence and PrEP rates
- Published gap ratios
- Breakdowns by race, sex, age, transmission

What We Don't Claim

- No individual-level data
- No predictive modeling
- No clinical outcome claims
- No AI-generated estimates
- No precision beyond county level

INTERFACE

THE HOME SCREEN

FEED VIEW

The Feed

Default view, tonight's photos.

DATA CARDS VIEW

Data Cards in the Feed

County stats between photos.

MAP TAB VIEW

The Map

One tab away, tonight's dots.

EDGE CASES

EVERY PATH LEADS SOMEWHERE

Skips zip code

Sees national data instead.

Skips PrEP question

Neutral card. General morning text.

Skips the feed

Photo texted. Dot on the map. Private.

Nobody is forced. Every path is complete.

03

THE BUSINESS

SYSTEM

HOW DATA MOVES

1 · CONSENT

Before anything is collected

Onboarding screen explains what we ask and why.

- "Prefer not to say" is equal size.
- Skip contact, still get your card.
- No PII required to participate.

2 · COLLECTION

What we gather during the flow

Only what the experience needs. Nothing more.

- Zip code
- Prevention answer
- One photo
- Phone + IG (both optional)

3 · STORAGE

Where it lives, briefly

GCP or AWS. Encrypted at rest and in transit.

- AES-256 at rest
- TLS 1.2+ in transit
- Access scoped per role
- Aggregate reports only to Gilead

4 · DELETION

Nothing persists beyond 24 hours

Photos gone in seconds. Everything else by morning.

- Photos: purged on delivery
- Phone numbers: after morning text
- Zip + answers: within 24 hours
- No long-term profiles. No archive.

SMS: TCPA/10DLC compliant **API:** Feed into your CRM or pipeline **No PII** leaves our infrastructure

LEGAL

LEGAL: THE DATA

RISK	HOW WE ADDRESS IT
Rates misread as headcounts	"Per 100K" shown next to every rate.
Dots read as geographic	"Proportional, not geographic" on every map.
Derived calculations challenged	Simple division of published AIDSVu data. No AI.

DATA DISCLAIMER SCREEN

LEGAL

LEGAL: PRIVACY

RISK	HOW WE ADDRESS IT
PrEP status linked to photos	Answer never shown as text. Color tint only.
Photos screenshotted from feed	Explicit opt-in. "Your card will be visible."
Unsolicited texts	TCPA language before send. Morning text is separate opt-in.
Prevention question feels invasive	"Prefer not to say" is equal-sized, not a dismiss.
PrEP status exposed via photo	Answer is color tint only, never text.
User unaware before engaging	Onboarding explains everything before any input.

PRIVACY DISCLAIMER SCREEN

LEGAL

LEGAL: RETENTION + CLAIMS

DATA STORED TOO LONG

Photos purged on delivery. All data deleted within 24 hours. Encrypted everywhere.

IMPACT VIZ READ AS MEDICAL CLAIM

Framed as conversation, not protection. "Protect" never used. Dots turn blue. No efficacy claims.

SCALE

WHAT'S POSSIBLE

Reusable. Built once, deployed anywhere. New event = new branding.

Beyond the screen. Photo cards, coasters, wristbands, table tents.

Beyond the party. Web app lives year-round. Clinics, barbershops.

Works anywhere. Branding changes. Data is national. Universal.

INVESTMENT

INVESTMENT
